* Offer a major program that prepares students for grad school
* Serve students in other disc.
* Introduce all students to math - Harvey
* Foster connections betw/ 4th + math
The mission of the department is to provide opportunities for our students to educate themselves in the discipline of mathematics and computer science, and to assist in their general intellectual, moral, and spiritual growth as Christian thinkers. The educational opportunities include: an understanding of the broad content, historical context, and philosophical questions naturally connected with these disciplines; a critical appreciation of the disciplines for their own sake as well as of role they play in society; an understanding of the relationship between these disciplines and other spheres of knowledge; a vision for the use of knowledge acquired for service as a disciple of Christ.

- Comm. Skills
- Prep for careers + Grad school.
- Skills of analysis
  - Math thinking / Problem solving
