Field Work Safe Practices

General Area or Specific Job Safety Class ___________________________________________

Date Prepared ___/____/____

Preparer ___________________________________________

Safe Workplace Conditions

• Hand-held tools must be kept in good condition.
• Short-handled hoes are not permitted for cultivation.
• Appropriate first aid supplies must be available.

Safe Work Practices

• No employee may use pesticides unless trained and approved by the supervisor.
• Pesticides must be mixed per label instructions and training.
• Symptoms of pesticide poisoning must be reported to the supervisor immediately.
• Employees must not enter pesticide-treated fields until the pesticide is dry or settled, or according to posted re-entry intervals.
• Employees must avoid stooping or squatting to the extent possible.
• Employees must be trained about biting and stinging pests that are prevalent in the area.
• Employees must notify the supervisor of any snake or animal or severe insect stings.

Personal Protective Equipment

• Pesticide applicators must wear required safety equipment (gloves, respirators, clothing) as appropriate.
