To get oriented, read/listen/watch the entire sequence (plus the shaded boxes above/below) before you depart. It helps a lot!

Google time estimate: 42 minutes
Dial = The clock-dial directions assume noon is straight ahead of you, 3 o'clock is a normal right turn, and 9 o'clock is a normal left. Thus a 2 o'clock turn (aka 2:00 in text) is between noon and 3, closer to 3—and so on.

Distance = mi; b-lock; yard

Odom = If you a) zero your trip meter; b) proceed without detour; and c) have an accurate odometer, you can gauge progress in the Odom column. (Due to rounding error, cumulative total Distance may not match Odom.)
