Road conditions, traffic management, and landmarks are constantly changing. You may encounter new stop signs, stop lights, roads, buildings, construction detours, recently paved streets, and other variations from what you see here. Please help us make things better next year by returning this page to Troy with changes, errors or hazards noted.

To get oriented, read/listen/watch the entire sequence (plus the shaded boxes above/below) before you depart. It helps a lot!

### Seq | Direction | Dial | Road Name | Distance | Odom | Video Cues | Narrative
--- | --- | --- | --- | --- | --- | --- | ---
A | Uphill & left turn towards town | 9 | at entrance to RAV | 9.4 mi | 0 | Push play when you reach the outskirts of town | - From wherever you parked on the Agua Viva campus, head back up the hill and out thru the main gate.
- On your way out the gate, just before you get onto the highway, set your trip odometer to zero. Enjoy the ten-mile journey down the mountain.
- Remember that the o'clock directions you may get later assume that noon is straight ahead of you, 9 o'clock is a right-angle left and 3 o'clock is a right-angle right turn. Thus a 2 o'clock turn is in between, more toward 3 than noon, and so on.
- As you find yourself approaching the outskirts of town, push play again for your next direction. In the meantime, push pause.

B | Straight | 12 | Carretera Federal 3 | 1 mi | 10.4 | Push play when you reach the second stoplight since leaving RAV | - About a mile before the second stoplight you'll start seeing the outskirts of the city. At the second stoplight after leaving Agua Viva, you'll be going straight thru.
- As you find yourself approaching the second stoplight, push play again for your next direction. In the meantime, push pause.

C | Straight | 12 | Carretera Federal 3 | 0.9 mi | 11.3 | Push play when you reach the third stoplight since leaving RAV | - As you proceed thru the second stoplight since leaving Agua Viva, you'll go straight thru.
- As you find yourself approaching the third stoplight since leaving RAV, push play again for your next direction. In the meantime, push pause.

D | Right | 3 | 4-lane divided boulevard called Calz. Aguilas | 1.5 mi | 12.8 | Push play when you reach Reforma | - Once you've turned right onto the divided boulevard you'll go about a mile and a half to Reforma where you'll turn right again.
- As you find yourself approaching Reforma, push play again for your next direction. In the meantime, push pause.

E | Right | 3 | Reforma | 1.0 mi | 13.8 | Push play when you reach the sixth stoplight | - At the stoplight at Reforma, turn right. You'll go about 1.4 miles to the 6th stoplight. At stoplight number 6, you'll turn left. The cross street onto which you'll turn is called Ambar.
- As you find yourself approaching the 6th stoplight, push play again for your next direction. In the meantime, push pause.

F | Left | 9 | Ambar | 0.5 mi | 14.3 | Push play when you are near 7-Eleven | - After the left on Ambar, go about half a mile until you see the 7-Eleven, where you will turn right.
- As you find yourself approaching 7-Eleven, push play again for your next direction. In the meantime, push pause.

G | Right | 3 | Av. Ruiz | 0.2 mi | 14.5 | Push play when you are approaching the fork | - Turn right at the 7-Eleven.
- Continue until you see a fork with three streets, about 0.2 mi.
- As you find yourself approaching the 3 streets, push play for your next direction. In the meantime, push pause.

H | Right | 2 | Placido Mata | 0.1 mi | 14.6 | Push play when you are approaching the stop sign | - Take a 2:00 right turn onto the street on the far right. You will see a white wall on your right after turning. Continue about 0.1 mile until you see a two-story brown house on your left.
- Congratulations! You've arrived at your destination.

Google time estimate: 25 minutes
**Team Leaders:** Brandon Wong, Hailey Turner

**Mapgrid:** E2

---

**Westmont College – Potter’s Clay – RAVrav**

**Dial** = The clock-dial directions assume noon is straight ahead of you, 3 o’clock is a normal right turn, and 9 o’clock is a normal left. Thus a 2 o’clock turn (aka 2:00 in text) is between noon and 3, closer to 3—and so on.

**Distance** = mi-le; b-lock; y-ard

**Odom** = If you a) zero your tripmeter; b) proceed without detour; and c) have an accurate odometer, you can gauge progress in the Odom column. *(Due to rounding error, cumulative total Distance may not match Odom.)*
