

## 2019 Student Wage Scale

The Student Wage Scale is provided to help you determine student wages. **The wage you assign to first time student employees must be between the bottom and top wages listed in the categories on this scale**, and the total wages the employee will earn must be within your student wage budget. Jobs are graded based upon difficulty, experience, and the level of training required to perform them. Students in jobs that lead/supervise others a minimum of 50% of the time are paid one grade higher than the job supervised.

You must provide Career Development & Calling with written approval from your departmental VP for any wage exceeding \$13.25/hr.

### Pay Grades

**General** - Includes all entry-level student jobs that do not require previous training or special skills other than basic computer skills. May require on-the-job training.

**Skilled** - Skilled jobs include positions that require a higher level of responsibility and some previous training or experience. Positions offer extensive on-the-job training or require certification. Students may be supervising other students in the General category.

**Specialist** - Specialist jobs require special skills or an advanced level of academic or other qualifications. The position might involve a high degree of training, and/or extensive previous experience. Job duties may include hiring, training, scheduling and supervising students in the Skilled category.
