

CS010 ± Introduction to Computer Science I
Fall, 2011

ach a desired level of proficiency to develop and strengthen skills. RFP

ed exercises; some students will not need to do all the

others will have to do

more. Realize that these are guidelines and you should adjust for your own situation by

lls. I will be happy practicing exercises until you master the

additional exercises if exhaust the problems found in the text. Start on assignments as soon as they are available and submit your solutions via Eureka well before the deadline as late work will not be accepted. Using the DrRacket environment and tests you create, you will know for yourself if solutions work or not. Detailed feedback is available during office hours. I will review a subset of exercises in class. Exercises will be evaluated @ 11:00 am & 1:00 pm.
